Ministry of Finance & Planning  

February 20th, 2014

Dear Sir,

Training Course on Minimally Invasive Surgical Techniques

In order to strengthen cooperation and communication, deepen mutual understanding and friendship between China and Sri Lanka, Academy for International Business Officials, Ministry of Commerce, P.R. China, will hold **Training Course on Minimally Invasive Surgical Techniques for Asian and European Countries** from April 3rd to April 30th of 2014 in Guangzhou. I’d like to invite 1 doctor in relevant fields appointed by your government to attend this program.

1. Requirements of Participants
   1.1 Participants shall be under 45. Otherwise, a medical report is necessary.
   1.2 As the lectures are to be given in English, participants are supposed to possess associate degree or above and to have a good command of English with strong skills in listening, speaking, reading and writing.
   1.3 Participants are supposed to be in good health with health certificate issued by the local public hospitals; without diseases with which entry to China is disallowed by China’s laws and regulations; without severe chronic diseases such as serious high blood pressure, cardiovascular / cerebrovascular diseases and diabetes; without mental diseases or epidemic diseases that are likely to cause serious threat to public health; not in the process of recovering after a major operation or in the process of acute diseases; not seriously disabled or pregnant.
   1.4 Participants are not allowed to bring family members, relatives or friends during the training.

2. Major Activities during the training course
   This training course is a combination of topic studies, simulation operations, and clinical practice. The topic studies and simulation operations aim at training of Minimally Invasive Surgery in basic theory and fundamental motor skills, so that the trainees can learn about the updated knowledge and the advanced skills in the fields of general surgery, hepatobiliary surgery, gynecotokology, and urinary surgery, etc. And the skills are to be taught by standardized simulation operation. Basically, the training of motor skills involves coordination of hand-eye-endoscope, targeting adaptability, tissue isolation, suturing and knotting. The motor skills training is based on a new
model which is called "three-rooms-three-stages: psychological training is carried out in the classroom, simulation training (including three parts: mechanical simulation, three-dimensional simulation, animals simulation) in the skills training room, and clinical training in the operation room. During the course, there will be a series of visiting activities, which include a tour to Shanghai, the largest city in China, exchange programs with doctors in different hospitals, investigation of the poor rural area in Guangdong Province, shopping activities in the city center, and a comprehensive tour of Guangzhou city.

3. **Material Preparation of Participants**
   3.1 Copy of passport within valid period, the expiry date shall be no less than 6 months from the ending of the Seminar
   3.2 Application Form, please fill in clearly, especially email address and mobile number.
   3.3 Medical report if over-aged
   3.4 Other materials according to personal need

4. **Expenditure**
   4.1 **The following expenditures will be covered by Ministry of Commerce, People’s Republic of China**
   4.1.1 Round trip international air tickets
   4.1.2 Accommodation and meal (Alcoholic Beverages are not included), insurance
   4.1.3 Transportation of activities arranged by the organizer
   4.1.4 Daily allowance of RMB 80 yuan is provided for each participant.
   4.2 **The following expenditures are to be paid by participants**
   4.2.1 Charge for overweight during international or domestic travel and any extra air ticket fees caused by asking for transfer, reschedule and refund because of personal reasons.
   4.2.2 Communication expense as well as passport and visa fees.
   4.2.3 Expense of filling a prescription, fitting false teeth, hairdressing and inspection, treatment and medication of various types of chronic diseases.

Please kindly help to recommend candidates and provide our office with relevant materials (including passport copy, Application Form, and medical report) before **March 14th**. We will inform you after the name list is finally determined.

Sincerely yours,

[Signature]

### About the Organizer

Southern Medical University, formerly the First Military Medical University of Chinese People’s Liberation Army, was established in 1951. The University was demobilized in 2004 and was renamed as Southern Medical University. It is one of the first batch of national key universities in China. It has a great number of national and provincial level key disciplines. It has 16 schools, 6 affiliated hospitals, 7 post-doctoral research stations, 75 doctoral programs and 98 postgraduate programs. It has a faculty of 1100 senior professionals, and 3 of them are academicians. And it enjoys very extensive connections and cooperation with dozens of universities in USA, Japan etc.

Southern Medical University has been organizing the national foreign aid training programs since 1999. The foreign training center of the University, a detached garden-like compound on campus, is well equipped and has a professional management team. It is a key training unit of the Ministry of Commerce and one of the 10 National Education Aid Bases of the Ministry of Education. It performs a variety of training programs all the year around, such as seminars for senior officials of medical institutions, seminars for hospital management, seminars for public health management, seminars for development and maintenance of medical equipments, and training courses on many different subjects like clinical medical techniques, prevention and treatment of infectious diseases, nursing, minimally invasive surgical techniques, medical techniques and equipments application, traditional Chinese massage techniques and etc. More than 1500 officials and technicians from over 90 countries have been trained here.

### Training Content

This training course is a combination of topic studies, simulation operations, and clinical practice. The topic studies and simulation operations aim at training of Minimally Invasive Surgery in basic theory and fundamental motor skills, so that the trainees can learn about the updated knowledge and the advanced skills in the fields of general surgery, hepatobiliary surgery, gynecotokology, and urinary surgery, etc. And the skills are to be taught by standardized simulation operation. Basically, the training of motor skills involves coordination of hand-eye-endoscope, targeting adaptability, tissue isolation, suturing and knotting. The motor skills training is based on a new model which is called "three- rooms-three-stages: psychological training is carried out in the classroom, simulation training (including three parts: mechanical simulation, three-dimensional simulation, animals simulation) in the skills training room, and clinical training in the operation room. During the course, there will be a series of visiting activities, which include a tour to Shanghai, the largest city in China, exchange programs with doctors in different hospitals, investigation of the poor rural area in Guangdong Province, shopping activities in the city center, and a comprehensive tour of Guangzhou city. The training course will not only be a journey for experiencing national conditions and folk cultures in China, but also a platform for mutual exchange and learning to enhance our understanding and friendship.
