Officials of Ministries of Health
Member Nations of the Commonwealth

Dear Sir/Madam

Commonwealth eVarsity

The Commonwealth Medical Association is keen to help doctors across the Commonwealth update their knowledge and skills so that the healthcare offered by them will match patient's expectations.

The outcome is the Commonwealth Medical eVarsity that offers online Continuous Professional Development Programs and Courses. The courses cover a broad spectrum of practice areas of immediate relevance at general practitioner level. The content is delivered in the form of video lectures, slides, animations, reading material, case studies and other learning aides. Topics for study and cases are delivered in convenient online weekly packages with self and graded assessments that eventually lead to certification.

The fee structure has been kept at affordable rates to make the courses accessible to the widest range of doctors. We believe that through the commonwealth eVarsity doctors now have the possibility of enhancing their knowledge and skills, irrespective of where they live and practice. We are confident of the value these courses deliver and their broad based appeal and request your support in promoting them among your membership.

For more details of the courses and registration please visit the website
