Implementation of the Planning Information Management System (PMIS)

I am pleased to inform you of the successful implementation of the Planning Management Information System (PMIS) that automates the workflows at Management, Development and Planning Units (MDPU) enhancing the efficiency and accuracy of operations.

As of 2024, the PMIS has automated three key processes, namely Project Proposal Management, Capital Budget Management, and Capital Budget Monitoring. All concerned departments and personnel must utilize the PMIS for these workflows.

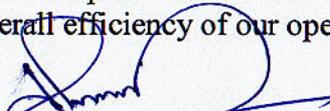

In line with this transition, I urge you to ensure that all paper-based records are duly entered into the PMIS. Continuation of only the paper-based submissions may result in process delays and complications. However, please retain these paper records until further notice, in parallel with the use of the PMIS.

The training program on the PMIS was conducted last year and those yet to receive user credentials or training, kindly reach out to the focal point at the MDPU for assistance. Additionally, should you require technical support regarding the PMIS, do not hesitate to contact the MDPU.

Enclosed with this circular is the user manual for the PMIS. This document is also accessible through the application for your convenience.

For further information or queries, please contact Dr. Apsara De Silva at the office of the DDG (Planning), Ministry of Health, at 0112679997 or via email at pmis@health.gov.lk.

Your cooperation and adherence to this new electronic system are crucial for its success and the overall efficiency of our operations.

Dr. P.G. Mahipala
Secretary Health
